

I CLAIM:

1. An assembly for holding a portable hair dryer having a handle and a nozzle comprising:
  - a cradle for holding said hair dryer, said cradle having a lower portion adapted to receive the handle of said hair dryer and an upper portion to receive and support the nozzle of the hair dryer;
  - a mounting means design end to be mounted to a substrate; and
  - a connecting assembly between said mounting means and said cradle, said connecting assembly permitting movement of said cradle in at least two mutually perpendicular planes.
2. The assembly of Claim 1 wherein said connecting assembly permits movement in three mutually perpendicular planes.
3. The assembly of Claim 2 wherein said connecting assembly comprises a goose neck.
4. The assembly of Claim 2 wherein said connecting assembly comprises a scissor arrangement having one end thereof connected to said mounting assembly and a second end connected to a said cradle.
5. The assembly of Claim 2 wherein said connecting assembly includes first and second pair of arms, a first end of first said arm being connected to said mounting means, a second end of said first arm rotatably connected to a first end of said second arm, said second end of said second arm being connected to said cradle.
6. The assembly of Claim 4 further including a goose neck interposed between said second end of said scissor arrangement and said cradle.
7. The assembly of Claim 6 wherein said goose neck is mounted on top of said second end of said scissor arrangement.

8. An assembly as defined in Claim 1 wherein said lower portion of said cradle comprises an upper ring and a lower ring.
9. The assembly of Claim 8 wherein said upper ring is larger than said lower ring.
10. The assembly of Claim 8 wherein said upper portion of said cradle is U-shaped.
11. The assembly of Claim 10 wherein said cradle is formed of rod-like members.
